How to attend the interview

Please read carefully and provide the relevant feedback when requested to do so

The interview will be held according to the schedule specified above at MUSE, Trento, Italy. Attendance in person is preferred, this will give you a chance to better interact face to face with the selection panel, to see our site and working environment and find out more about our activities in seed research and conservation.

We are aware however that this may not be possible for all of you and so we will endeavour to organise a remote interview using Skype or other video or audio conferencing tools if your attendance is not possible.

We however strongly encourage candidates presently living in Europe to make all possible efforts to come to Trento to attend the interview in person. An essential travel guide is attached.

As well as an opportunity to meet with you and discuss your qualifications, knowledge & experience in relation to the post advertised we would like to ask you to prepare a short presentation (approximately 10 minutes – maximum 8 slides) that outlines your background, past experience and results (max 3 slides), what you can bring to this project and why you applied (max 2 slides) and your ideas of the opportunities and challenges in producing and using the seeds of native plants in environmental restoration with particular reference to seed science (max 3 slides).

You must bring with you proof of identity (i.e. passport or national identity card) and of academic qualifications. At this stage of the recruitment process we will contact your referees if they have not already provided a relevant reference.

We would be most grateful if you could confirm by return email (nasstec@muse.it) whether you will be able to attend the interview in person or remotely.

Should you wish to withdraw from this selection please let us know at your earliest convenience.

Kind regards

The selection panel.

Trento, 6 June 2014
